

Manufactured from 100% recycled polyethylene, Netpave 50 provides a structural, permeable, plowable and versatile solution for parking surfaces, paths, and energy dissipation applications.

Lug and Slot connections of Netpave 50 enable easy installation. Flexible joints allow for flexibility in areas of undulation or varied slope. This flexibility allows for increased durability in cold weather climates prone to freeze and thaw cycles.

Netpave 50 can be tamped into the existing turf grass, filled with gravel and soil/grass. In turf grass installations, Netpave 50 protects the crown of the plant from damage and reduces compaction from driving, parking or other uses. Netpave 50's can be used for temporary or permanent installations and are reusable and recyclable. In areas receiving runoff, Netpave 50s can be removed for easy clean out of sediment buildup and reinstalled for continued use.

### Technical Specifications:

*Individual Paver Size:* 500 mm x 500 mm x 50 mm deep ( 1.64 feet x 1.64 ft x 1.96 in)

*Shipping Size:* 1 meter x 1 meter (3.28 ft x 3.28 ft)

*Weight:* 9 kg/square meter (19.8 lbs/10.76 square ft)

*Load Bearing:* 200 tons per square meter (10.76 square ft)

*Material:* 100% recycled polyethylene

### Your Benefits:

- Reduced Impervious Surface
- Multi-Functional Space Use
- Stormwater Management
- Reduced Maintenance
- Proven Return On Investment
- Ease of Installation
